❧ CATALOGUE ❧

— OF —

WINDOW · SHADES

— AND —

Shade Hardware.

PAPER · HANGERS' · TOOLS, · SUPPLIES, · & C.

*NEW YORK JOBBING BRANCH,*

NATIONAL WALL PAPER CO.,

416-422 Broome Street, cor. Elm Street,

NEW YORK.

**W**E wish you to understand that we handle only the **BEST QUALITY** and **MAKE** of the different grades of **SHADE MATERIAL**, and prices quoted are for perfect goods. Should Competition make it necessary to lower our prices, you will get the benefit; or, if any change in cost of manufacture makes it necessary to advance prices, we claim the right to do so, but remember you will always be sold the goods at lowest market quotations.

**NEW YORK JOBBING BRANCH,**  
**NATIONAL WALL PAPER COMPANY.**

NUMBER 3.

January 15th, 1895.

# ILLUSTRATED CATALOGUE

Page and Order Number, as shown by Invoices.

---

NOTICE PERFORATED SLIP IN FRONT OF THIS BOOK.

**WE SEND UNDER THIS COVER**

OUR SECOND ANNUAL CATALOGUE OF

**Plain and Decorated Mounted Window Shades,**

**— SHADE, UPHOLSTERY AND VESTIBULE HARDWARE —**

**Wall Paper Devices and Paper Hangers's Tools.**

We want to impress upon you the fact that we deal exclusively in Wall Paper and Shade Goods, and **by making your selection from this list you may feel sure you are buying the right goods and buying them at right prices, and in ordering by number you will save very much time, annoyance and expense.** Keep this list lying on your counter, and refer to it for whatever you want in this line, allowing your customers to consult it freely. By the arrangement as shown by the perforated slip in front of book, you may make this Catalogue do duty as a very superior salesman.

### **CHANGES IN PRICES.**

We desire to distinctly impress upon those who receive this Catalogue, that **"All prices are subject to change without notice."**

### **IMPORTANT SUGGESTIONS.**

State particularly how to ship goods, whether by freight, express or mail. Goods sent by mail are always at risk of purchaser. **Our responsibility on freight and express shipments ceases when we deliver goods to the transportation company.**

**Goods sent as ordered cannot be taken back.**

In checking a bill of goods, open every paper box, as it is often convenient to pack several articles of a different description under a cover designed for one.

*Please destroy your Shade Catalogue No. 1 for 1894, and order from this.*

Order by number and descriptions given, and do not mutilate Catalogue.

Respectfully,

**NEW YORK JOBBING BRANCH,**

**NATIONAL WALL PAPER CO.**

January 15th, 1895.

## OUR SHADE MANUFACTURING DEPARTMENT.

**W**E make a specialty of manufacturing shades in special sizes for residences, stores, and office buildings. We use only *the best* materials and employ skilled workmen, and guarantee the shades we turn out first-class in every respect. Estimates furnished.

For the benefit of our customers we submit herewith illustrations showing the different methods of hanging shades, and giving instructions for the proper measurement of windows.

All measurements for the width should be made from point to point on each side of casing where brackets are to be placed.

All measurements for the length of shade should be the net measurement from top to bottom of window.

We will make the necessary allowances in width for the satisfactory working of shade, and in length for the hem and turn upon roller when shade is drawn down full length.

When shades are to be hung, as illustrated in Fig. 1, on the outside or surface of casing facing the room, give exact distance from points as designated by *W* to *X*, being extreme distance from point to point where brackets are to be placed, and for length of shade the distance from *M* to *N*, and state in ordering, "outside bracket measure."

The shades when finished will be from 1 to 1½ inches narrower than your measurement, and contain 6 inches more of cloth.

When shades are to be hung, as illustrated in Fig. 2, on the inside or surface of the casing which face each other, give the distance from *J* to *Z*, the exact distance from jamb to jamb of window at points where brackets will be fastened, and for length the distance from *Q* to *R*, and state in ordering, "inside bracket measure."

Measurements for shades hung in this manner should be very accurate, even to a sixteenth of an inch.

Measure each window separately.

State whether shades are to roll from top or bottom of window. In the former the roller is fastened at the top, and in the latter case at the bottom of window.

In hanging shades observe carefully the printed instructions on each roller regarding the proper adjustment of spring.

USE ONLY THE "EFFICIENT" FIXTURES.

SEE PERFORATED SLIP AND FRONT PAGES FOR DISCOUNT AND TERMS.

## OUR SHADE MANUFACTURING DEPARTMENT.

**W**E make a specialty of this department of our business, and guarantee the shades which we turn out the best which first-class material and skilled workmanship can produce.

Below we give a schedule of prices for making up shades in various sizes. In ascertaining costs of shades from this schedule, it will be necessary to use the prices for dimensions next larger than the shades you desire, unless the shades wanted are exactly the same as schedule dimensions. *For instance*, a shade 66 inches wide and 9 feet 6 inches long, will cost the price given for a shade 72 inches wide and 10 feet long.

We use only the well-known "Efficient" spring stop roller in our special order work, and mount all shades of this nature on rollers of sufficient size and strength to perform the work required in a satisfactory manner.

### SCHEDULE OF PRICES FOR SHADES IN SPECIAL SIZES.

Made from "Onondaga" Hand-Made Opaque, mounted upon "Efficient" spring stop rollers—ready to hang.  
 Sizes in schedule are for shades when finished. Prices are for single shades.

LENGTH OF SHADE FINISHED.	WIDTH OF SHADE IN INCHES.

15 " .....	2.10	2.90	3.12	3.52	4.60	4.90	6.70	7.00	8.20	10.00

*Lettering, in plain shaded gold letters, 60c. per lineal foot.*

**Special Note.**—In ordering state whether the measurements given are *cloth* or *bracket* measure, and if bracket whether *inside* or *outside*; see illustration and explanation on previous page. State color of cloth desired; if shades are wanted 48 inches wide or wider, much correspondence and annoyance will be saved if selection of color is made in "Onondaga" goods only, as our other brands of opaque shadings are not manufactured in all widths, and the matching of their colorings in hand-made goods is not at all satisfactory. If any lettering is wanted, inclose a printed card bearing name or names to be used. We cannot be responsible for misspelling where shades are lettered in other than the English language.

See page 30 for list of "Onondaga" colorings. *Sample books mailed on application.* Special colorings will have to be made to order at an extra expense, and the time necessary to make the cloth will be from ten days to two weeks.

See next page for cost of finishing any of above shades with fringes.

See pages 33-39 for cuts and description of fringes.

SEE PERFORATED SLIP AND FRONT PAGES FOR DISCOUNT AND TERMS.

## SCHEDULE OF PRICES OF BANCROFT'S "SUN FAST" HOLLAND SHADES, IN SPECIAL SIZES.

Mounted ready to hang.

*Prices are for single shades.*

7 feet and over, per foot.....	\$0.84
--------------------------------	--------

## 4 INCH DIAMETER.

Made from 12 feet to any required length; for very wide and heavy shades, maps and awnings.

12 feet long and over, per foot.....	\$1.80
--------------------------------------	--------

An allowance of 25 cents per case, net (\$1.00 a gross), is made on 1¼-inch Rollers when packed in quarter gross cases—36 of one diameter in a case.

An allowance of 50 cents per case, net (\$2.00 a gross), is made on 1½ and 1¾-inch Rollers when packed in quarter gross cases—36 of one diameter in a case.

Ordering in regular packing is not only economy, but damage in shipment is prevented by the uniformity of sizes in the same box. With a little care you can make your order so as to obtain the deduction.

**NEW  
PATENT  
"EFFICIENT"**

**SHADE  
FIXTURE  
BRACKET.**

Is the most important improvement in shade rollers since 1867. It is at once an inside, outside, top, bottom, ceiling and car bracket. It works equally well either side up, can be used like an ordinary bracket by those who do not believe in new things, and the roller will work in any bracket that may have been in use. Under all conditions the pawls may be made to engage or not by merely changing the roller end for end.

## NASH'S ADJUSTABLE SHADE BRACKET.

INDISPENSABLE TO HEALTH AND COMFORT.

Showing Left Hand Bracket.

Showing Right Hand Bracket.

The Adjustable Shade Bracket is a new invention. It is so formed as to fit any depth window jamb and extend out over the casing. By using this bracket the shade is attached to the upper window sash instead of the casing, but allowing it to occupy the same extended position on the casing as with the old style fixtures.

The result is that in lowering the upper sash to admit fresh air or to allow the foul air to escape, the shade is also lowered, allowing the air to pass freely in and out above it, which gives perfect ventilation without the constant whipping and rattling of the shade by the wind.

Perfect ventilation from top can be secured, while the shade can cover the lower part of the window.

No. 25 Adjustable to any ordinary window (no roller).....per dozen pairs, \$3.70 ; per gross pairs, \$42.00

"EFFICIENT," "VERMONT" AND "PEOPLE'S" ROLLERS CAN BE USED IN THESE BRACKETS.

Showing window with Bracket on upper sash, with Shade Roller.

Showing Shade hung by Nash Adjustable Brackets.

SEE PERFORATED SLIP AND FRONT PAGES FOR DISCOUNT AND TERMS.

## LAKESIDE WINDOW SHADE GUIDE.

An attachment to run the shade straight, and prevent damaging the cloth. Of invaluable use in hotels, schools and large apartment buildings.

It consists of an L-shaped piece of steel with screw to put up under bracket to hold the wire, 8 feet of copper wire, a screw with perforated head to tighten the wire, with an adjustable porcelain head and a steel detachable device for the end of the slat which runs up and down on the wire. Cuts illustrate the different parts and the complete guide as it is attached to the shade and window frame.

The different parts are packed complete with wire in neat paper box. One dozen sets in a carton.

No.	Per Doz.

## DEVICES FOR USE IN WINDOW SHADE AND WALL PAPER STORES.

### THE YEOMAN REVOLVING SHADE EXHIBITOR.

The Exhibitor can be turned around to any point desired, so as to draw out any curtain for inspection. It can be fastened on the side wall, out of the way of other goods, requiring no floor room to show your samples. It is the best device of the kind ever invented for showing curtains full size, and will save its cost the first year selling "remnant" curtains alone, not mentioning convenience of displaying new ones. Each Exhibitor has 24 Spring Fixtures, all fitted and ready to tack on the curtains, or can be furnished without rollers, if preferred.

With Rollers.....	Each,	\$15.00
Without Rollers....	"	10.00

### DUNKLE ADJUSTABLE WINDOW SHADE STRIP.

The most complete Shade Hanger in the market. Can be adjusted to suit any width of shade from 34 to 40 inches. Brackets and nails complete with each hanger. Can be retailed at 10 cents each at handsome profit to the dealer. Packed  $\frac{1}{4}$  gross in heavy paper boxes. We do not break boxes.

Price.....per Gross, \$18.00

SEE PERFORATED SLIP AND FRONT PAGES FOR DISCOUNT AND TERMS.

## LAKESIDE BUNDLE HORSES.

FOR COUNTER AND FLOOR USE, IN TYING OR BUNDLING WALL PAPER.

No. 651.

ADJUSTABLE SHELF-PARTITIONS.

No. 662 Made of japanned iron, and take up no shelf room, keep patterns separate, and stock can be condensed as sold, as Partition is movable. Packed 50 in a case.

Per case..... \$12.00  
Per dozen..... 4.00

LAKESIDE WALL PAPER DISPLAY RACK.

Will hold four hundred samples thirty-two inches long, two hundred on each side; Cut shows one side closed, samples locked up, raised to a level like a table, and out of the way of dust, etc. The side in operation is held at this angle, or any other desired angle, by a self-acting ratchet as shown by figure 2; The samples are held in place by a self-binding device which a child can

understand and operate; no sample book is required as the binder does the work; a device is attached which will hold the border samples in proper place and at proper angle; 50 pieces of cardboard are supplied upon which the various widths of borders can be mounted. Built of hardwood, by skilled labor, and the handsomest Wall Paper Display Rack in the market.

CUT SHOWS RACK IN POSITION TO DISPLAY SAMPLES.

No. 610 Rack with Border Cards, complete..... EACH. 20.00  
615 Extra Sets of Cards for Borders..... 4.00

SEE PERFORATED SLIP AND FRONT PAGES FOR DISCOUNT AND TERMS.

## READING'S TELESCOPIC EXTENSION WALL PAPER EXHIBITOR.

Patented January 5, 1892.

This Exhibitor is intended for showing wall paper in the roll. The special feature is the telescopic extension, by means of which it is instantly lengthened. The display leaf is supplied with a ratchet, so that it may be adjusted to any angle to secure the proper light on the goods.

The Exhibitor is made of oak and white wood finished antique, and provided with castors.

The display leaf is covered with an imitation of upholsterers' leather.

The regular size is four feet high, three feet eight inches long when closed, and six feet long when fully extended.

Special sizes made to order.

EXHIBITOR PARTLY EXTENDED.

No.	Each.
635 44 inches, extends to 72 inches .....	\$32.00

## LAKESIDE WALL PAPER SAMPLER.

No.

600 Made of heavy tin; size of surface for showing sample,  $4\frac{1}{2}$  inches square. The best device ever offered for sampling wall paper in bins .....

Per 100.

\$8.00

No. 660.

## READING'S SAMPLE-BOOK STAND.

The most complete, economical and convenient device in existence for holding and showing sample books.

The cut fully illustrates the stand and the method of hanging and keeping the books when not in use. The display leaf at end is adjustable, and so simple as to need no explanation. The crossbars, upon which the books are hung, are attached to pivoted arms, which swing from side to side and make an opening of sufficient width to allow a book to be easily replaced.

The crossbars should be labeled to correspond with the books which belong to them. By this means any desired book can be quickly found and taken out or put back.

This stand is equally good for wall paper, window shade cloth, table and carriage oil cloth, and all other goods sampled in book form.

It is made of oak, well finished and mounted on castors.

645 Will hold 27 books, 2 ft.x3 ft. .... Each, \$30.00

SEE PERFORATED SLIP AND FRONT PAGES FOR DISCOUNT AND TERMS.

## WALL PAPER TRIMMERS.

THE READING COMBINED TRIMMER AND MEASURING MACHINE.

Patented March 17, 1891, and May 16, 1893.

Will trim or measure separately, or do both at the same time. Two of the latest improved winding rods go with each machine. One is for rapid winding, and the other for close or compact winding. The latter makes the rolls as small and tight as when they left the factory.

As a Wall Paper Trimmer it is noiseless, rapid, simple and durable. It is the only Trimmer made without a noisy cog-wheel gear, and trims faster and makes a cleaner cut than any other machine in the market. It trims 22 inch paper, with any width margin up to 2 inches. The knives are made of the best saw steel, carefully tempered, ground and finished, and the whole machine is run by a single endless rubber belt. When the belt becomes slack from any cause, it can be instantly tightened by adjusting a screw provided for that purpose. A metal fender prevents the trimmings from winding into the roll, and conducts them away from the machine.

As a Measuring Machine it is rapid and accurate. Every inch of paper or border is honestly counted, and it never gets "rattled" nor forgets the number of yards measured. It automatically unrolls, accurately measures and compactly re-rolls the paper or border at one operation. It is useful in taking inventory or sorting up and measuring cut rolls and remnants; also for trimming and measuring off a single roll in filling orders.

No.		Each.
606	Combined Machine.....	\$30.00
602	Trimmer only.....	20.00

## ALLEN'S Keystone Double Trimmer.

No.		Each
100	Two sets of cutting knives; trims both edges of the paper at the same time; makes a clean, true cut for butting; will trim either 20 or 22 inch paper; 200 pieces of paper can easily be trimmed (on both edges) in one hour.....	\$30.00

SEE PERFORATED SLIP AND FRONT PAGES FOR DISCOUNT AND TERMS.

## PAPER-HANGER'S PASTING TABLES.

No. 504. Ready for use.

Has hardwood frames and legs, whitewood top, and a strip of zinc six inches wide to cut on.

The zinc is attached by means of grooves, leaving the top of Table level and smooth. It is also provided with straight edge holders, but no straight edge.

The Table is instantly adjusted without the use of hooks, screws, buttons or pins; is rigid and durable, and, all complete, weighs about 18 lbs.

No.	Each.
504	6 feet 8 inches long, 22 inches wide, and 30 inches high..... \$8.00

No.	Per Set.
502	Two pieces (with dowels), 7 ft. long, 20 in, wide..... \$2.00

No. 504. Closed.

## ADJUSTABLE FOLDING TABLE.

No. 506. Ready to use.

Closed. No. 506. Open.

No.	Each.
506	Has folding top and legs attached. Is strong and compact, simple and light, weighing but 16 lbs. Size, 20 inches wide, by 6 feet long..... \$8.00

## NOVELTY PASTING TABLE.

Patented April 3d, 1894.

OPEN READY FOR USE.

When open is 6 feet long and 22 inches wide, 30 inches in height, and stands firmly on the floor—has rubber tips on the legs to prevent slipping. Is the neatest and best thing ever invented for the purpose; saves all trouble and annoyance of barrels or boxes to put a pasting board on being carried to the rooms.

CLOSED.

When folded is a neat box less than 3 inches thick, which can be carried in any car, and no objection will be made to taking it into the best room in the house. Room for the tools inside. Also *made to fold lengthwise*, weight only about 15 pounds. Also made 7 feet in length.

No.	Each.
508.....	\$8.00

SEE PERFORATED SLIP AND FRONT PAGES FOR DISCOUNT AND TERMS.

PAPER-HANGERS' KNIVES.

No. 100 3¼ inch blade, round point, wood handle..... Per Doz. \$3.60

## LAKESIDE WALL PAPER HANGERS' PASTE.

Clean and strongly adhesive, always sweet and ready for use; no offensive odor.

Barrels of about 275 lbs .....per bbl. \$4.00

SEE PERFORATED SLIP AND FRONT PAGES FOR DISCOUNT AND TERMS.

## A NEW DEVICE

For Stippling, Stenciling, Frosting on Glass, and for paper-hangers' smoothing and seam rollers. Has had a practical test of five years' constant use, as the testimonials with directions on each roller will show. Made of Brass, in lengths two, five and eight inches, by one and three-quarter inches diameter.

### THE PRINCIPAL FEATURE OF THE ROLLER

Is, that it opens to receive the ends of the cloth or plush, and when closed draws the same tightly around the cylinder, clamping it firmly, and preventing any rotary or side slipping on the cylinder, leaving no seam—thereby overcoming all former objections, as well as trouble and waste of time in sewing, nailing or pasting cloth on rollers. The covering can be taken off, washed and replaced in a few moments, or will keep fresh for two days by placing the roller in its air tight box.

No.					
52	Two inch, in air tight box	.....	Each,	\$2.00	
53	Five " " "	.....	"	3.00	
54	Eight " " "	.....	"	4.00	
55	Three rollers"	.....	Per set,	9.00	

SEE PERFORATED SLIP AND FRONT PAGES FOR DISCOUNT AND TERMS.

## PUTTY KNIVES.

ALL SEVEN INCHES LONG.

No. 800.

No. 800 Plain beech handle, elastic steel blade, square point..... Per Doz. \$2.70

No. 980.

No. 980 Coco handle, riveted, elastic steel blade, square point..... Per Doz. \$3.40

No. 9001.

No. 9001 Solid handle, stiff steel blade, square point..... Per Doz. \$3.60

06	Polished brass, 3 inches long, with rubber face, for $\frac{1}{4}$ inch rod.....	\$2.00
16	Same for $\frac{3}{8}$ inch rod.....	2.40

## VESTIBULE ROD CUTTER.

For cutting brass rod. Will cut  $\frac{1}{8}$  to  $\frac{3}{8}$  inch wire.

This rod cutter is the best, and by far the cheapest on the market. The above cut represents the complete machine, and we give below cuts representing all the different parts.

The cutting dies are made from the best cast steel, carefully tempered, and of such proportions as to secure the greatest strength and durability.

An important feature, which will commend itself to the customer, is the interchangeability of the parts, enabling the owner to replace a damaged or broken part readily, and at slight cost.

No.		Each
20	Complete for $\frac{1}{4}$ inch and $\frac{3}{8}$ inch rod.....	\$7.00

When ordering parts separately, order by letter, as given in above cuts.

## TELESCOPE EXTENSION VESTIBULE RODS.

No.		Per Doz.
144	Telescope rod, $\frac{1}{4}$ inch, extends 12 to 24 inches; inside and outside brackets with each rod.....	\$2.00
244	Telescope rod, $\frac{1}{4}$ inch, extends 24 to 44 inches; inside and outside brackets with each rod.....	2.50

## SPRING EXTENSION VESTIBULE RODS.

Nos. 137, 138 and 139 with outside brackets.

Nos. 137, 138 and 139 with inside brackets.
